April 14, 1994

Subject: Test performed at Bimco, Inc. with Dyna-Lube Oil Treatment.

I bid a job drilling 74,880 .052 diameter holes in aluminum plate. When we started this job we broke off 4 drill bits in the plate in less than 400 holes. We thought for sure that we were going to lose a lot of money. At this time, we tried using Dyna-Lube in a spray mist on the drill as it was drilling. We drilled over 74,000 holes without breaking a drill bit. We ended up finishing the job ahead of schedule. When we figured out our cost we made about 10% over rate.

The buyer on this job told us that we had bid 1/3 as much as our competition.

I drive a 1993 Lincoln Town car with a big V8 engine. I have Dyna-Lube in it and I get between 26-30 miles per gallon on the highway and 23-24 miles per gallon back and forth to work.

I love Dyna-Lube in my life; I have 4 snowmobiles, 3 motorcycles, 4 cars, 2 trucks and 15 machines at my place of business that use Dyna-Lube. I recently purchased a 1994 boat with 454 V8 engine, I have already started using Dyna-Lube in it.

DYNA-LUBE DOES NOT COST US MONEY, DYNA-LUBE SAVES US MONEY!
